

Electrostatic Therapy

RECHARGE is effective against prevalent diseases such as:

- › Allergies
- › Arthritis
- › Asthma
- › Autoimmune Diseases
- › Cancer
- › Chronic Fatigue Syndrome
- › Diabetes
- › Fibromyalgia
- › Hepatitis
- › Herpes
- › HIV/AIDS
- › Hypertension
- › Influenza
- › Insomnia
- › Kidney Disease
- › Leukemia
- › Meningitis
- › Migraine
- › Muscular Dystrophy
- › Neuralgia
- › Parkinsonism
- › Psoriasis
- › Somnambulism

AND COUNTLESS MANY OTHERS...

What is RECHARGE Electrostatic Therapy Machine?

RECHARGE is an electrostatic therapy machine specially designed for both preventing and eradicating the root cause of cancer, viral diseases, and diseases of unknown cause (unknown etiology). It is by far the only healing machine that can achieve remarkably fast result. There have been cases with complete recovery within few days to few months depending on the disease and severity. RECHARGE was introduced in 1968 by the Japanese inventor, Junji Takano.

Outstanding Benefits

- › Eradicates The Root Cause of Viral Diseases, Cancer, and Other Diseases of Unknown Cause
- › Result is Instantly Observed
- › No Side Effects and Impossible to Overdose With
- › Very Easy to Use
- › Safeguards and Maintains Better Health
- › Overcomes Fatigue and Stress.
- › Lightweight and Easily Transportable. Only 2 kgs
- › Trouble-Free
- › Maintenance-Free

Technical Specifications

Rated Input Voltage

220-260 VAC or 100-120 VAC (depending on country of destination)

Any portable travel voltage converter can also be used when traveling from one country to another.

Output Power

Negatively-charged high voltage static electricity (special DC electric field); extremely low current.

Frequency

50/60 Hz

Power Consumption

less than 1W

Weight

2 kgs

Size

10"x7.5"x3.25" (LxWxH)
